Summary

Experienced Frontend Team Lead with over 10 years in development and team management. Specialize in designing and building complex Vue.js and React applications with TypeScript, integrating with microservice architectures (Node.js, Go, Python). Skilled in process building, mentoring, and scaling teams. Extensive experience in international products (SaaS, e-commerce, healthcare, hospitality). Active in the professional community and contribute to open-source pet projects.

Key Skills

Frontend	JavaScript (ES6+), TypeScript, Vue.js (2/3, Pinia, Vuex), React, Next.js, PWA, SSR
Backend & DevOps	Node.js, Python (FastAPI), Go (microservices), Docker, CI/CD (GitLab, GitHub Actions), Nginx
Testing & Monitoring	Jest, Cypress, Sentry, Playwright, Storybook
Architecture	SPA/MPA, scalable frontend modules, API design, legacy project migrations
Team Leadership	Junior mentoring, code reviews, architectural discussions, task setting, onboarding
Soft Skills	Business interaction, C-level decision-making, conflict resolution
Languages	Russian — native, English — B2 (Upper-Intermediate)

Work Experience

2021–Present — **Senior Frontend Developer / Team Lead**, *Apteki.ua*, Healthcare / e-commerce
- Redesigned legacy JavaScript/PHP website to Vue.js (TypeScript) + Golang backend.
- Led new site architecture, participated in tech stack selection with backend and business directors.
- Optimized frontend: migrated Vuex → Pinia, introduced Sentry, refactored CI/CD → 35% faster releases.
- Organized junior mentoring: promoted one junior to mid-level in 9 months.
- Launched PWA version → 20% lower bounce rate, 15% higher mobile conversion.
- Ensured scalable architecture for mobile app integration.

2023 — **Senior Frontend Developer**, *Axios*, Hospitality SaaS
- Built hotel management system with booking and accounting integrations.
- Optimized frontend for real-time handling of large data volumes.

2019–2021 — **Frontend Developer**, *Guestready*, PropTech / Airbnb ecosystem
- Developed cleaning management system integrated with Airbnb API.
- Implemented analytics dashboards for orders and staff performance.
- Optimized Vue components → 25% faster page load.

2015–2019 — **Frontend Developer**, *Elephant Learning*, EdTech
- Created gamified math learning platform for children.
- Designed frontend architecture.
- Integrated payment system and parent dashboards.

2010–2015 — **Web Developer**, *Elephant Head Software*, Healthcare startup
- Built psychological support website with online consultation module.
- Worked with JavaScript, PHP, and jQuery.

Selected Achievements

- Increased release speed by 35% at Apteki.ua via CI/CD optimization and code reviews.
- Reduced bounce rate by 20% and increased conversion by 15% through PWA and mobile optimization.
- Progressed from Senior Frontend to Team Lead, managing up to 5 developers.
- Established onboarding process — new hire ramp-up time reduced from 3 to 1.5 months.
- Participated in architectural discussions at CTO and board level across multiple projects.

Community & Contributions

dev.to Blog on frontend architecture and team leadership (up to 400 views, 20 reactions/month).

Reddit Active in r/vuejs, r/webdev — help newcomers with testing (Jest, Cypress, CI/CD).

Twitter/X Threads on Vue, React, productivity, and onboarding.

Pet Projects

Healthcare FHIR Viewer React + TypeScript + FastAPI frontend for visualizing FHIR-standard medical data.

Common Lisp Finance Tool CLI application for expense analysis.

Vue Analytics Dashboard Vue 3 + TypeScript dashboard for metrics collection and analysis.

Career Focus

- Team Lead / Engineering Manager growth path.
- Designing scalable frontend architectures.
- Team development and mentoring.
- Contributions to international products (SaaS, healthcare, e-commerce, proptech).
